California Border Healthy Start

Presented by:

Howard Taras, MD

Professor of Pediatrics

University of California-San Diego

Learning Objectives:

1. Understand the basic pathology underlying dental caries.
2. List at least 3 common errors parents make that put their infants/toddlers at risk for poor oral health.
3. List 3 best practices that parents can use to prevent oral health problems and their underlying rationale.
4. Know how to apply fluoride varnish to a child's teeth.
